AMENDMENTS

In the specification:

At page 27, delete the Abstract and replace with the following paragraph:

A system and method for accessing a data network telephony account using a wireless personal information device (PID). The user may connect over the wireless cellular infrastructure to a telephony control server via a data network for access to the user's telephony account, which indicates the user's telephone number in a telephone number entry. Once the connection is made, the user issues a command to set the telephone number entry in the user's data network telephony account to a specific telephone number. The user may then
